

DotX Control Solutions is looking for

Programmer (C / C++)

About DotX Control Solutions

DotX develops high performance control software for machines, so that these perform optimally. Examples of products for which we developed the control software: wind turbines, 3D-printers, a prey-simulator for lions, process installations. We are located in MAAK in Haarlem, between other innovative startups.

Who are we looking for?

We are looking for a programmer to help us develop our software products further.

Your tasks include:

- programming in C++, C and Matlab code
- writing (simple) PLC en DCS code
- implementing and testing the software

Qualifications

- BS or higher in a relevant field like information technology, computer science
- experience with C (experience with C++ is a pre)
- skilled in working with people
- responsible, focused, dedicated and drive for excellence

What we offer

We offer challenging projects (that you run yourself), lots of freedom, good salary, and regular fun activities (because life is meant to be fun).

How to apply

Please send your application with a motivation letter and your CV to:

info@dotxcontrol.com
